None

⇨ **Save**

Make sure there is one principal investigator.

Assign roles
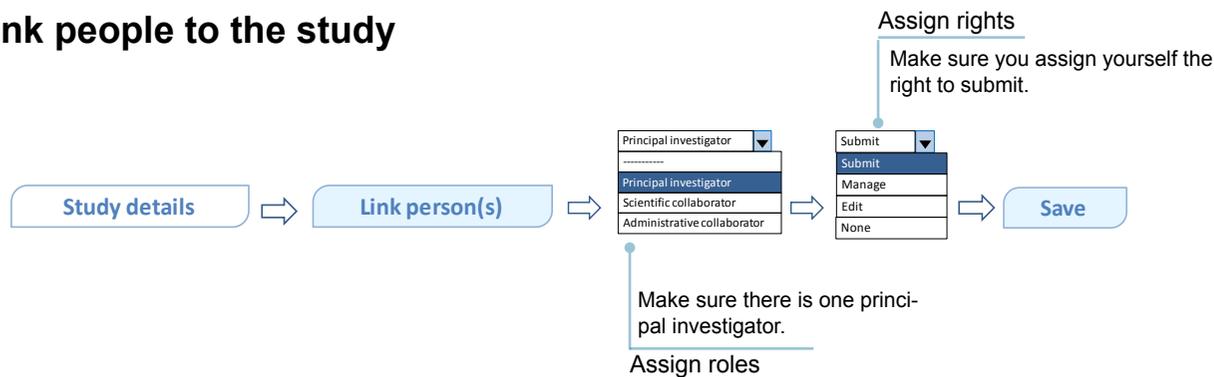

Note: Linking people to the study increases visibility. Following their rights, linked people can edit the study.

3 Submit your study

**Study details** ⇨ **Submit**

Note: Once validated by FORS your study will appear in the FORSbase catalogue. After validation you will be able to go back to your study details and make further changes.

ⓘ If you wish to attach datasets and data files to your study for your own use, or for data sharing, see:
Quick steps to archiving your data with FORSbase

Why register your study ?

Your research project will appear in the most complete research catalogue to date in the social sciences in Switzerland, along with over 11'000 other projects. It represents a great opportunity to make yourself better known in the field and for networking. Registering your study will also facilitate data sharing at a later stage if you intend to do so.

Get to know your FORSbase environment
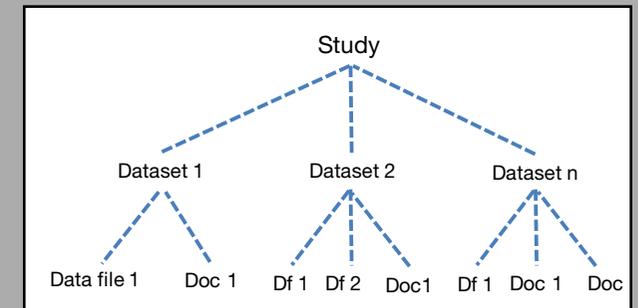

In FORSbase language...

A **study** is a research project. It usually involves the collection of data: quantitative, qualitative or mixed.

A **Documentation** can be at the dataset level.

A **dataset** is a data file, or several data files, and data-related documentation.
