

## Frédéric SGARD

Frédéric Sgard is project administrator at the [Global Science Forum of the OECD](#), where he manages selected Forum activities. He has been involved in many of the Forum's projects on research infrastructures, including that on the [Reference framework for assessing the scientific and socio-economic impact of research infrastructures](#). His current portfolio includes work on “mobilising science in time of crisis” and a new project on “Very Large International Research infrastructures”. Frédéric Sgard was a member of the programme committee of the International Conference on Research Infrastructures (ICRI) and acts as independent expert for various European research infrastructure projects.

Prior joining the OECD, he worked as senior scientist in a pharmaceutical company until the end of 2002, on the discovery of new pharmacological targets. Trained as a molecular biologist, he studied Molecular Genetics at the University of Paris XI, Orsay (France), and obtained his Ph.D. from the University of Reading, UK, in 1994.
